The Azehna Project is a high performance, net zero energy home, aiming for Passive House as well as Living Building Challenge, Net Zero Homes certifications all on a single residential project. At the heart of the project is an aim to be biophilic in all aspects of design and regenerative to the natural landscape its built on. In keeping with this aim, the project makes use of many low embodied-carbon, zero-VOC, and reclaimed/recycled materials.

2560 Steve Ellis Rd, Nanaimo
British Columbia
*From Jingle Pot Rd, turn on to Shady Mile Way, go to the very end of the road, and turn right up a new road that leads into a new development called ‘Woodland Flats’. The road is called Ellis Rd., but then becomes Steve Ellis Rd. The house is the second last lot on the right before the end cut-de-sac. Look for our project billboard out front.

November 9th, 3pm - 5pm

Please contact Mike Leggett at mike@orahomes.ca for more information.
