

Passive House Days

Canada - November 8 - 10, 2019

Blindheim Passive House

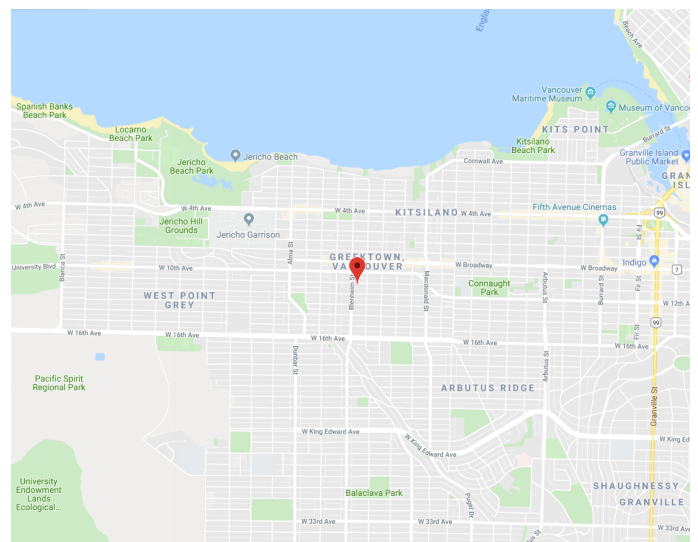

Designed to intelligently push creative design boundaries and produce a comfortable, quiet, and resilient house without compromise, the building maximizes performance and efficiency, whilst minimizing maintenance and cost. Its design incorporates large North and South facing glazing areas to create a seamless connection to the outside, and thick opaque East and West walls to conceal all services, mechanical systems, storage, closets, kitchen, and neighbours.

 3266 West 11th Avenue, Vancouver
British Columbia

 Friday, November 8th, 10am - 4pm
Saturday, November 9th, 10am - 4pm
*Note that it is a construction site, so dress as you feel necessary. The project is essentially finished the backframing stage, so is quite clean, but is still an active building site.
