Maple Bay Passive House is a 3 bedroom home with a 1 bedroom in-law suite currently under construction on a south facing slope of Maple Mountain overlooking Maple Bay. Targeting PH Plus certification, it incorporates a 12 kW PV solar array and a Sanden HP. The many evergreen trees surrounding the site proved to be a challenge for solar ingress, resulting in a building with thick layers of insulation.

526 Maple Mountain Rd, Duncan
British Columbia

Saturday, November 9th, 12pm - 4pm
