Radiance Cohousing is a 9-unit townhouse-style cohousing development located in Saskatoon, Saskatchewan that was completed in the fall of 2018. The project was led by a diverse group of people who pooled their resources, formed a development company, and worked together to plan and manage the development of their own homes. By combining cohousing with environmental design, this project showcases quality homes that build community and respond to a changing climate.

2 - 475 Avenue L South
Saskatoon, SK
